

View All Real-Time Event Information in One Online Dashboard

HomeTown's event management system is the only solution that provides school officials with real-time ticket sales, deposits and event attendance across the entire district. HomeTown provides districts with a turn-key revenue generation system that dramatically simplifies the

event management process. Our online box office filters by school, department or event, automates the billing process and schedules daily, weekly or monthly deposits into the accounts designated by the district, saving endless hours of manual reporting for each school.

District-Wide

Manage all school district events through one central online location.

Digital

Process secure, PCI-compliant, online credit card payments.

Real-Time

View real-time event and ticket sales reports for the entire school district.

Secure

Assign permissions for staff to view and edit data and volunteers to scan tickets.

Administrators HomeTown

"Makes the district side of the process easy."

Rick Hartley
Superintendent,
Blooming Grove Independent
School District

"Simplicity for administrators and spectators."

Randy Tevepaugh
District Administrator,
Streetsboro City School

"For a small district, it was easy to implement and very user friendly."

Blake Schneider
CFO,
Thrall Independent School District

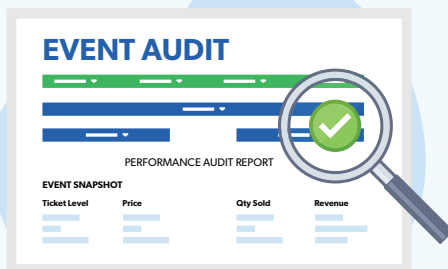

See Ticket Sales Data for Every Event

HomeTown provides school districts with real-time visibility into ticket sales data for every event in the district. Easily access ticket sale summaries for each event, aggregated from online sales, on-site POS sales and cash transactions and filter reports by date, school, team, department or venue.

Review Payout Reports

School district CFOs and treasurers can schedule automatic transfers from their payment processor account directly into their district bank account. Quickly view granular payout reports and detailed batch transaction reports of all ticket sales data from every event within your school district.

Manage Departments and Venues

HomeTown provides school administrators all the data they need to review the financial performance of any event in their school district. View ticket sales, quantity and revenue, broken down by ticket price levels and sales reports to-date, as well as unsold seats, held seats and promo code usage.

Assign User-Level Permissions

HomeTown allows administrators to assign user-level permissions to their staff to control who has access to specific departments and the ability to make changes to specific data, while granting volunteers limited access to the HomeTown Gate app to scan tickets for fans to attend specific events.
